## Our Mission

To play a leading role in Service Provision in the mining sector through hard work, zeal and unparalleled innovative ideas

## Our Vision

Our vision is to become the go-to company for mining sector services in South Africa and beyond. We aim to achieve this by continuously improving our processes, investing in cutting-edge technology, and hiring top talent from various engineering fields

## Our Values

**Quality** – Guaranteed 100% workmanship.

**Service** – Our team is always on call for Technical support and to advice.

**Empowerment** – Skills transfer and empowerment of young tradesman and new entrances in the engineering field through our qualified artisans and engineers.

*“when you choose us for your next project you’re getting a comprehensive solution tailored specifically to meet your needs”*

## Our Services

1. **Integration** - incorporating new or refurbished hydraulic hammer attachments and drifters to work efficiently with your existing equipment.

2. **Design** - Supplying the right breaker / drifter to perform the job you need.

3. **Fault Finding** - don't waste time and money by using a process of elimination approach. Identify the fault within the system through a technical based testing approach.

4. **Repair** - OEM parts are used on our EDT Range of Hammers as well as on all our drifters. Any other hammer parts needed will be manufactured within

our workshop.

5. **Rebuild** - Understanding what needs to be replaced, repaired, remanufactured so that the hammer/drifter is returned to original specifications.

6. **Testing** - From individual component testing through to complete system analysis you will have confirmation that the machine will do the job it's designed to do.

7. **Component Selection** - Selecting the correct part for the application ensures that the machine performs at its best for longer.
